Project

Real Estate Portal   Nov 2022 — Apr 2023

Tools – html and css, bootstrap, php pdo , mySQL database, XAMP server and WAMP server..
A real estate portal is an online medium where anyone can list properties for sale through their site's backend.
Backend tools we use here PHP with MySQL database and to create frontend we use bootstrap.
Its categories by two category one is - Client , They can request, like and share property.
And other one is Admin panel where admin can do all CRUD operation on the properties.
